

# Sussex County Charter School for Technology (SCCST) Summer Enrichment Program

- ✓ FREE 6-week program for all incoming 6<sup>th</sup>, 7<sup>th</sup>, 8<sup>th</sup> graders
- ✓ Reading and math enrichment for ALL levels
- ✓ Differentiated instruction

The (SCCST) will be holding its *Summer Enrichment Program* starting Tuesday, July 12<sup>th</sup> and ending Thursday, August 18<sup>th</sup>. The program will run Tuesdays, Wednesdays, and Thursdays, 9am through 12pm, with a basic skills option from 12pm to 1pm.

## FOR THE LOVE OF READING

Is your child a **struggling reader**?

*This program is for you!*

Is your child **reading at level** and has a passion for literature?

*This program is for you!*

Is your child an **advanced reader** and looking for a challenge?

*This program is for you!*

**Objective:** To enhance every child's love of reading literature and engage even the most resistant of readers.

During this six week enrichment program, teachers will be differentiating instruction based on individual needs and interests. Following a brief reading level assessment, students will be divided into appropriate groups in order to tackle various genres of fiction and nonfiction. **Poetry circles, play reading and presenting, novella/short story analysis, and high interest, subject-specific texts will all be incorporated.** Topics will be a collaboration of ideas, and all students are encouraged to come prepared to share their interests.

## MATH IS EVERYWHERE

Have you ever heard your child say, "**I hate math!**"

*This program is for you!*

Has your child ever wondered, "**When will I ever need this?**"

*This program is for you!*

Has your child complained, "**This math is too easy?**"

*This program is for you!*

**Objective:** To help your child excel at mathematical concepts, regardless of present level, and be excited about the challenge.

During this six week enrichment program, teachers will be differentiating instruction based on individual needs and interests. This math program is designed to meet the mathematical needs of your child through explicit instruction and fun. **Through technology, games and hands-on manipulative interaction, your child will begin to either grasp concepts that were previously discouraging or foster their passion for the subject in a more challenging way.** An initial assessment will be given to provide the teacher with the data necessary to inform this instruction in a more individualized way.

## BASIC SKILLS

Teachers will be on hand for an hour (12:00-1:00) following the morning enrichment period for **math and language arts basic skills remediation**. This is for all who require that extra individualization. Small group and low teacher student ratios will make this instruction feel more like tutoring than class work. This is the best way to truly keep that "summer loss" from negatively affecting your child's success next year.

**Sussex County Charter School for Technology (SCCST)**  
**Summer Enrichment Program**

Please complete the registration form in its entirety and return to the school office no later than Friday, June 10, 2016. Any inquiries can be made by contacting Jeanne Sevean at [jsevean@sussexcharter.org](mailto:jsevean@sussexcharter.org).
